Dear Department of Health Recruiting Team,

Hello, I am an experienced developer with strong .NET Framework, Web, and Back End skills. This letter is in regards IT Application Developer position. I admire Washington State's DOH mission for people to stay healthy especially in these trying times with COVID-19, and their mission to deliver critical information to partners to promote a healthy population.

During my time with People Tech Group, I have worked on and led development in various applications. I have been described to have servant leadership, when I had to lead projects never put myself above others to work better collaboratively.

I know trying to find the right candidate can be difficult. With my previous experience as a .Net and Web Developer, I think I would be a good fit and a helpful addition to your team. I work best when I know the mission of the project is for a good cause, and right now more than ever is important to keep Washingtonians safe as a longtime resident.

Thank you for your time
Sincerely, Eric Sheng
